

BRAND MANUAL | Standards & Guidelines

SMSA Express' Brand Manual Standards and Guidelines

These guidelines describe the visual and verbal elements that represent SMSA Express' corporate identity.
This includes our name, logo and other elements such as color, typeface and graphics.

Sending a consistent and controlled message of who we are is essential to presenting a strong, unified image of our company.

These guidelines reflect SMSA Express' commitment to quality, consistently and style.
These provide a framework for consistent application of SMSA Express' commercial identity as reflected in its various trademarks.
As SMSA Express' services, it is important that SMSA Express' brand elements, including all the elements that make up the company's visual identity, remain consistent.

Each of us is responsible for protecting the company's interests by preventing unauthorized or incorrect use of SMSA Express' name and marks.

If you have any questions, please don't hesitate to contact us at marketing@smaexpress.com

CORPORATE IDENTITY ELEMENTS

1.1 Signature

SMSA Express' signature, in regards to identity, is a structured logotype.

This is the only approved logo for a two-color positive signature in Arabic and English version.

The logo comprises of the violet letters SM together with its unique rendition of orange letters SA with an iconic arrow symbol inside the letter "a" (English version) and second letter 'mim' (Arabic version). This arrow mark is a subliminal symbol for speed and precision.

The primary and preferred version of the SMSA Express logo is a violet and orange horizontal lockup on a white background. It must be used whenever possible.

1.1.1 SIGNATURE ELEMENTS

1.2 Descriptor

A descriptor offers information that can be easily remembered. It is a catchphrase that helps the audience understand what our brand stands for and leave them enticed and wanting more.

1.2.1 DESCRIPTOR ALIGNMENT

Our tagline is a part of the logo and placed underneath SMSA typeface.

1.2.2 DESCRIPTOR USAGE

Our descriptor should be used in all our corporate communication

1.2.3 DESCRIPTOR TYPEFACE

Univers Lt (Standard)

1.3 Signature Variations

A logo variation is simply a variation or alternate version of the main logo.

A full brand identity design does not just include one logo, it includes a full alternative family logos that give you the widest range of versatility and potential for brand recognition.

1.3.1 Logo Versions

To apply SMSA Express logo, use one of these preferred logo versions.

These variations are designed to accommodate a wide range of applications.

- Preferred two-colored positive

- Preferred two-colored positive

- Two-color positive Over dark background

- One-color English (black)

- One-color reverse Over dark background

- Two-color positive Over dark background

- One-color Arabic (black)

- One-color reverse Over dark background

1.4 Signature Sizing

As a general rule, we follow this simple formula for calculating our logo size in any layout.

To get the right size logo, divide named "L" by the number shown on the sample layout to represent the identity.

Note: 2.5cm minimum for Logo Application

"L"

1.4.1 LOGO SIZING

• Vertical

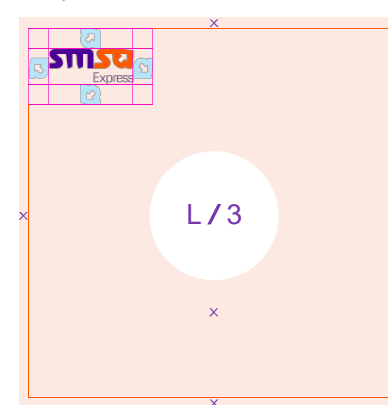

• Strip

• Horizontal

• Square

• Banner

1.5 Signature Usage

Follow these simple rules when using the logo. Always use our full color logo on a solid white background; otherwise you can use the signature variation rules described previously.

1.5.1 LOGO CLEAR SPACE

For SMSA Express logo to communicate effectively, it should not be crowded or overwhelmed by other graphic elements and away from the edge of a field or printed piece.

The minimum clear-space allowance is measured as “a” which equals the “a” height of the “SMSA” wordmark. Allow additional clear space whenever possible.

1.6 Improper Usage

Create a powerful impression by using only the approved logo variations and applying them correctly and consistently. Be sure to avoid these common misuses.

Shown in the figures are some unacceptable uses of SMTA Express logo.

The logo should always be reproduced from the master artwork, do not reconstruct the logo.

The logo should never be altered, redrawn, recolored or manipulated in any way. It is not allowed to append more descriptors to the logo.

1.6.1 IMPROPER USAGE

1.7 COLOR

Color is a powerful tool that promotes visual recognition. Our corporate colors have been selected to reflect a contemporary and fresh environment.

Violet, is a combination of power, energy and strength of red with the integrity and truth of blue. Psychologically purple presents luxury and quality.

Orange is warm, vibrant and flamboyant color. It is energy combined with fun. It represents vitality, inspiration and creates enthusiasm.

It is important to ensure that the corporate colors appear consistently in every medium and application, including high-quality production and reproduction.

1.10.4 TYPOGRAPHY and the INFLECTION POINT/ MISUSES

Kerning

To adjust the kerning between two letters, place your cursor between the two letters to be adjusted.

Ke|rning

Tracking

To adjust the tracking, make a specific selection and the adjustment will be carried out uniformly across all of the selected characters.

Track ing

Leading

To adjust the leading, select either the entire block or just the lines you want to adjust.

Leading is the space between lines of type.

Leading is the space between lines of type.

Leading is the space between lines of type.

Baseline Shift

To adjust the baseline shift, select the letter above or below the baseline.

Bas^eline Shift

NOTE: It is better not to adjust Kerning, Tracking, Leading and Baseline Shift unless needed

1.11 Grid System

A grid is used to organize space and information for the reader. It maps out a plan for the overall project.

1.11.1 GRID COMPONENTS

The main components of a grid are margins, markers, columns, flowlines, spatial zones and modules.

COLUMNS

Are vertical containers that hold type or images. The width and number of columns on a page or screen vary, depending on the content.

MODULES

Are individual divisions separated by consistent space, providing a repeating ordered grid. Combining modules can create columns and rows of various sizes.

MARGINS

Are buffer zones. They represent the amount of space between the trim size, including gutter, and page content. Margins can also house secondary information, such as notes and captions.

SPATIAL ZONES

Are groups of modules or columns that can form specific areas for type, ads, images, or other information.

FLOWLINES

Are alignments that break space into horizontal bands. Not actual lines, flowlines are a method for using space and elements to guide a reader across a page.

MARKERS

Help a reader navigate a document. Indicating placement for material that appears in the same location, markers include page number, running heads and feet (footers/ icons).

1.12 Modular Grids

Are best for controlling the kind of complex information found in newspapers, calendars, crafts and tables.

They combine vertical and horizontal columns which arrange the structure into smaller chunks of space no matter the size. This shows flexibility in terms of building the appropriate layout.

1.7.4. GRID SIZE, SCALLING & FLEXIBILITY

2.0.2 Business Card

Paper/ Material Specification:

- Specs 001 / Staff: Printed on CX22 (Conqueror Diamond White Paper) 320 GSM
- Specs 002 / Manager: Printed on Ice Gold 300 GSM

2.0.3 General Guideints

Paper tells about the function of the product. It's feeling and quality. Therefore it's a crucial part of the overall experience of your final product. Best of all is to start thinking about the choice of paper even before you start your work on the computer, not only to get the feeling right but also because of printing issues and costs.

Coated or Uncoated?

The decision to use either coated or uncoated paper is probably the choice that will affect the overall feeling of your product the most. So choose carefully. Coated papers have coating applied to one or both sides. It comes in a variety of smoothness, like matte, semi-matte or silk, and gloss.

All of the above except matte coated papers are usually best for printing photographs and other kids of art. Why is that? Because of the paper quality the ink in the printer doesn't get absorbed by the paper fibers but stays at the top. This gives brigther colors and the paper a somewhat glossy finish.

The uncoated paper, which has a rough, natural feel to it, is preferred before coated paper for productions that include lots of text. With this paper and the printer ink gets inside the top layer of the paper reflects light more than uncoated paper does. This can sometimes make it harder to read longer texts. Still the final decision should be all about what feeling you want to achieve with your product.

Usually coated paper is used for:

- Photography
- Things that should "pop"
- Annual Reports

Often Uncoated Paper is Used for:

- Stationery
- Books

2.3.1 Paper Stock, kind, color and weight

Letter Head:

- Conqueror, Stonemarque, uncoated paper, Diamond white, 100 gms

Business Cards:

- Conqueror, Stonemarque, uncoated paper, Diamond white, 300 gms

DL Envelopes:

- Conqueror, Stonemarque, uncoated paper, Diamond white, 120 gms

2.3.1 Paper Stock for Executives

Letter Head:

- Conqueror, Iridescent uncoated paper, Silver Mist, 100 gms

Business Cards:

- Conqueror, Iridescent uncoated paper, Silver Mist, 250 gms

DL Envelopes:

- Conqueror, Iridescent uncoated paper, Silver Mist, 120 gms

2.0.4 DL Envelope

DL Envelope

- A DL (Dimension Lengthwise) envelope measures 110 x 220mm.
- It fits A4 paper folded into thirds. These envelopes are popular for both professional and personal correspondence.

Color Guide:

2.1.3 B4 & C3 Envelopes

B4 Envelope

- B4 envelope measures 250 x 353mm.
- Slightly larger than C4 envelopes, it fits unfolded *A4 paper* and is ideal for thicker documents.

C3 Envelope

- Standard C3 envelope measures 458mm x 324mm.
- This is designed to fit unfolded A3 paper (which is double the size of A4 paper). *Standard A3* paper size is 297mm x 420mm.

Color Guide:

2.1.3 C5 & C4 Envelopes

C5 Envelope

- A standard C5 envelope measures 162mm x 229mm
- This is designed to fit A4 paper folded in half, or A5 paper unfolded. Standard A5 paper size is 148mm x 210mm (which is double the size of A4 paper).

C4 Envelope

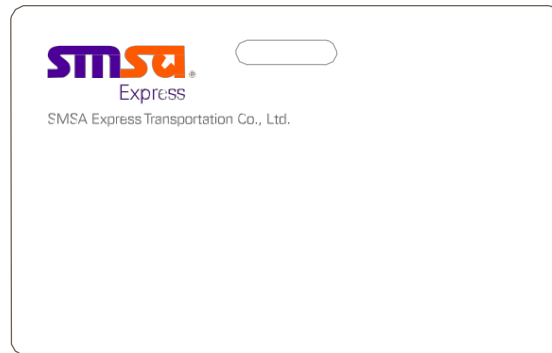

- A C4 envelope measures 229 mm x 324 mm
- It fits unfolded A4 sheets. These are ideal for documents that need to remain straight or unfolded, such as certificates, legal paperwork and business correspondence.

4.0 GENERAL GUIDELINES

GUIDE VEHICLES

Our SMSA Express fleet is a highly visual element around the world that shapes our brand image.

The vivid color of our vehicles make them clearly stand out in traffic and highly recognizable by our customers. In this guide, you will learn more about the typical look of our vehicles.

4.1 ESSENTIALS

Our SMSA fleet is made up of a variety of vehicle makes and models: trucks, vans, cars, and scooters as well as electric and environmentally friendly vehicles. Around the world, our fleet is one of our most important and valuable brand touchpoints. That's why our vehicles should always display a consistent branding. It is especially important that our vehicles are White and that the SMSA Express logo and claim are displayed properly and prominently.

We use our this Brand Guidelines to ensure consistent quality, catalog our vehicles and models.

4.2 DOS and DON'TS

Dos

- Only for white vehicles it is allowed to equip them with White vehicle wrapping film.

Don'ts

- Don't use other colors other than White.
- To ensure maximum brand visibility, adding additional SMSA products and services or any other advertisements, stickers, labels, or signs is not permitted.

4.3 COLORS

Our colors are a key asset of our Brand. The combination of our energetic primary colors Violet and Orange over white background, gives our Brand a unique, unmistakable look. In this guide, you will find precise color definitions for decals, and more.

White background on our SMSA Express brand is a central and permanent design element. It builds the stage on which to place our wordmark and it immediately attracts the viewer's attention. Placing our logo, typography, icons, and interface elements in white background focuses the eye on important messages and information and calls users to action. In addition to the Violet and Orange colors of our logo, white serves as the preferred color for background areas to create a clean overall appearance. Use dark gray or black for long copy texts.

SIGNAGESTANDARDS

5.0 Signage Standards

SMSA Express uses 3D sign letters and it can be classified into two types: Dimensional lettering and Channel lettering.

Dimensional lettering is for non-illuminated signs, which are favored for effectiveness. Dimensional lettering is clear and distinct with many designs and finishing options to choose from. Dimensional lettering can be used for exterior signs.

Channel lettering is of illuminated (or lit) signs. Similar to dimensional lettering is constructed of individual three-dimensional letters but is internally equipped to emit a particular lighting effect. Channel lettering is favored due to the benefit of day-and-night visibility and is commonly used as exterior or storefront signage.

5.0.1 Exterior Cladding Guide UMM Ramool DXB

Alucopanel APL - M04 Matt Silver
