

Overview	To orient all personnel on the required reports in CORE for Operations
Person Affected	Station, Hub and Linehaul Personnel
Instructions	Please refer below

CORE - VERSES REPORT

How to access:

Verses Report is available in Operations Report Menu in Core

Types of Reports:

A. Station Reports:

TRO Vs SIP - Identify shipments having missing SIP scan (this report to be run on Cons of Hub; it will ensure that all shipments from Hub are received in Station).

SIP Vs VAN - Identify shipments having missing Van scan

VAN Vs POD/DEX - Identify shipments having missing POD/DEX

SIP/VAN Vs POD/DEX - Identify shipments having missing POD/DEX (If SIP Vs Van is not 100%, then the Station Agent should run this report to capture all shipments).

POD/DEX Vs VAN - Identify shipments having missing Van scan

DEX Vs PMX - Identify shipments having missing STAT44 scan (it will cover shipments having SIP/VAN in current day).

Undelivered Vs Delivered - Used to run aged report; identify shipments not delivered since many days, this report to run back dated.

PUP Vs SOP - Identify shipments having missing SOP scan

SOP Vs PUP - Identify shipments having missing PUP scan
