- 5.2 Pharmaceutical Products shall be stored on pallets to allow easy cleaning, inspection and retrieval. Pallets are to be well maintained and kept in good State of cleanliness.
- 5.3 Designated areas are identified to store different range of products. SMSA Warehouse work areas and layout are marked according to its work flow processes into: Inbound, Outbound, Storage and Quarantine Area.
- 5.4 Storage area should be of sufficient capacity and physical segregation (or other validated segregation should be provided) for the storage of:
- 5.4.1 Expired products area.
- 5.4.2 Damaged products area.
- 5.4.3 Returned/Rejected products area.
- 5.4.4 Quarantine products Area (for recalled and counterfeit products).
- 5.5 The heavy Pallets shall be placed or put away on lower or bottom shelves.
- 5.6 If any staff want to pick the items from upper most or the higher racks/Shelves, then he shall lower down the pallet from forklift and bring to the ground/floor for picking. If staff needs to pick from upper most or the higher racks/Shelves by not bringing down the pallet, then he shall follow all the safety instructions as he should wear the safety harness/Belt, he should wear safety helmet, the pallet shall be tied with the forks of forklifts in order to fix the pallet to not to move.
- 5.7 Storage method of quarantine products are identified as follows:
- 5.7.1 Ambient products are to be kept at the designated rack under appropriate strict safety and security measures and label 'Quarantine' with reason of quarantine to be clearly marked on the product.
- 5.7.2 Cold Chain products: To be quarantined at desired temperature with indication 'Quarantine' the particular or specific location inside the Cold or Freezer room or in general 'Quarantine' area with temperature NMT 25°C along with other Items upon Approval from NUPCO/MOI. The Quarantined items must be blocked/quarantined in WMS system to avoid further allocation.

- 5.7.3 The controlled drug products which present risks of abuse should be stored in a dedicated area that is subject to appropriate strict safety and security measures.
- 5.7.4 Storage location(s) that are identified as "hot spot" during the temperature mapping of the warehouse, can only be stored with "non- temperature sensitive items". Signage/Label such as "Not for temperature sensitive items" are to be displayed on these locations at all times to caution staff for compliance. However the all Warehouse temperature shall be maintained +15°C to +25°C and Cold rooms at +2°C to +8°C, Freezer Room -1°C to -17°C.
- 5.7.5 Adequate precautions should be taken against spillage or breakage as per SOP SMSA-HC16.
- 5.7.6 There should be adequate lighting to enable all operations to be carried out accurately and safely.
- 5.7.7 The storage areas shall have appropriate ventilation.
- 5.7.8 Where controlled environmental storage conditions are required, these conditions should be continuously monitored and documented.
- 5.7.9 Appropriate actions, on the premises, equipment and/or materials should be taken when the storage conditions are not met. As far as possible, the actual storage temperature should be expressed quantitatively.
- 5.7.10 As the actual storage temperature is not expressed quantitatively or stated (in terms of range) on the labels of the registered product, hence the following Tables definitions should be used as a guidance where applicable:
- 5.7.11

On The Label:	Guidance Values:
Freezer	The temperature is thermostatically controlled between -1°C and -20°C.
Cold Room	The temperature is thermostatically controlled between 2°C and 8°C.
Cold Place	The temperature does not exceed 8°C.
